

# AUTOCLAVE DEODORANT

Manage Your Lab Odors  
With WHITNEY PRODUCTS.  
Low cost, safety & convenience

You can eliminate lab odors and maintain a fresh lab environment with Floral Bouquet, Fresh Lemon, Mountain Pine, or Regular scented Autoclave Deodorants.

## FRESHEN YOUR LAB

Keep your lab smelling fresh and clean with Terminal® brand Autoclave Deodorants. Our self-contained deodorant sachets eliminate odors produced by biohazard wastes, neutralizing the odors at their source. Toss one or more sachets into your biohazard bag before putting it in the autoclave. The heat of autoclaving causes the Autoclave Deodorants to open automatically, releasing their contents and leaving your autoclave fresh.

Convenient and very economical compared to alternatives, our Autoclave Deodorants are available in four attractive scents, Floral Bouquet (lavender pink), Fresh Lemon (bright yellow), Mountain Pine (deep green), or Regular (ocean blue).

To use as a room deodorizer, pour the contents of a sachet into a dish and place it near the source of the odor.

*You'll wonder how you ever managed <sup>lab odors</sup> without us.*

**Shipping Weight:** 2 lbs.  
**Quantity:** Carton of 200 sachets

**Order numbers:**
